

# The **All-in-One** **Platform:**

integrate, automate +  
build apps with custom AI  
capabilities.

rayven.io  
info@rayven.io

# Rayven is an iPaaS, Data, ETL, IoT, BI, Analytics, Automation, Workflow, PaaS, AI **All-in-One** platform that can improve anything you do, fast.

## Rayven simplifies the complexity of integration, real-time data analysis + custom app development.

Our platform is easy-to-use, universally compatible + infinitely scalable; combining all the capabilities of multiple systems to simplify your stack and turbocharge your existing technologies.

Deliver on the full potential of your real-time data + get the ability to create anything you need, now and forever.

Integrate anything + ingest data from anywhere.

Orchestrate data in real-time, build workflows + add AI.

Build UIs + apps that deliver real-time insights.

Secure, scalable + puts you in total control.

## Rayven enables you to:

**Integrate ANY technology, asset, system - anything**

**Build custom apps for any purpose, fast**

**Create new workflows + processes, simply**

**Ingest data in any format or interval + standardise**

**End data silos + ETL data anywhere in real-time**

**Add GenAI + Machine Learning to anything**

**Visualize data set in real-time with 40+ options**

**Automate any existing technology**

**Manage, store + process your data in one place**

**Deploy Rayven where you need it, even at the Edge**

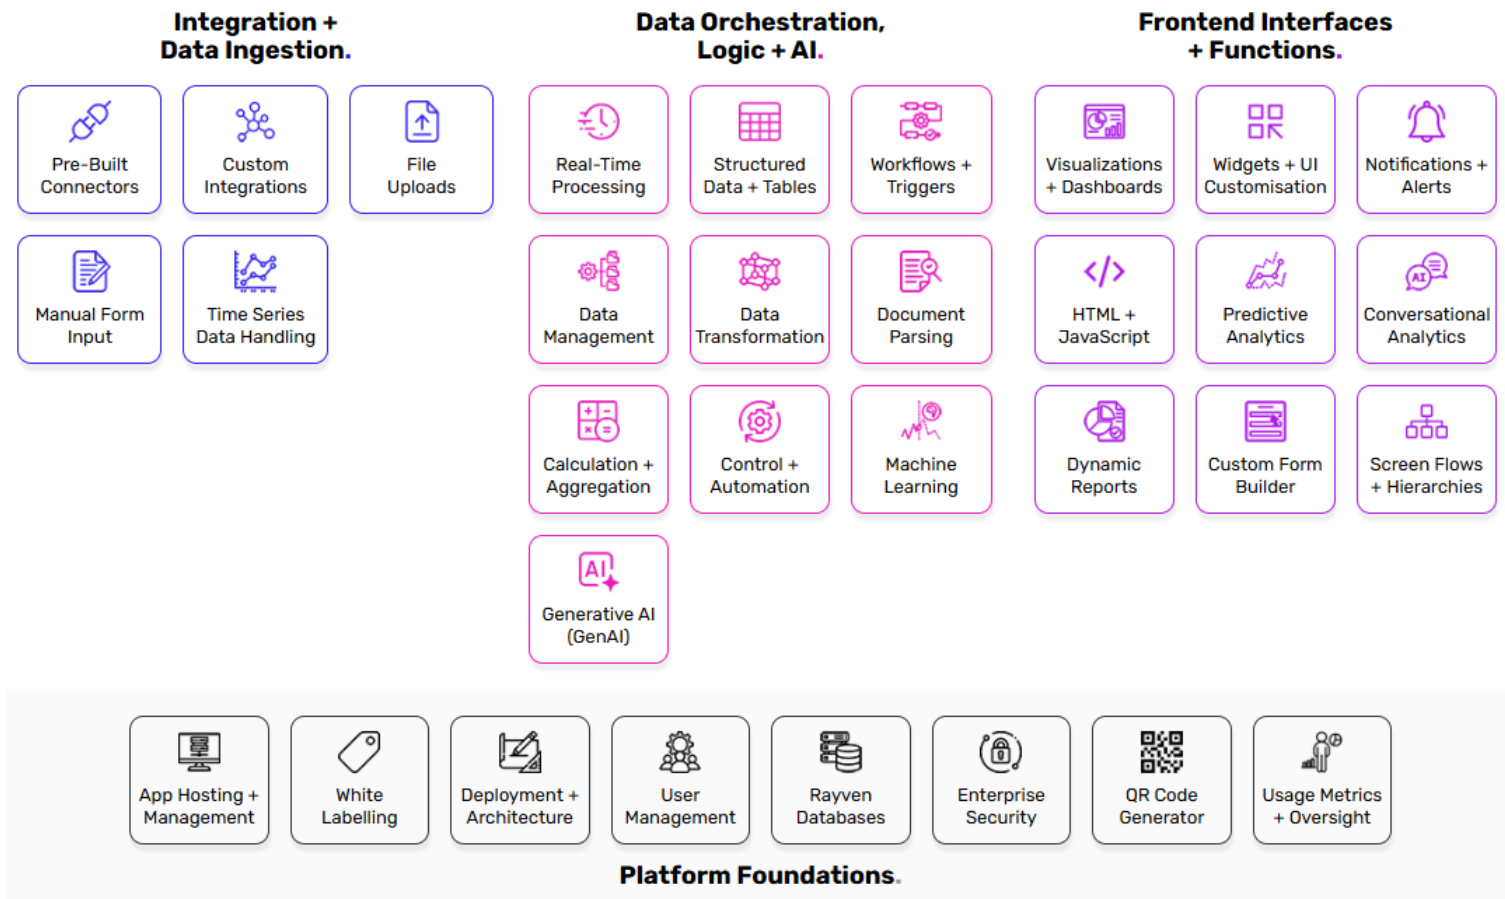

**Build custom alerts, dashboards + make reporting simple**

**Secure all your data sources, end-to-end**

**Rayven is a complete toolkit:** get all the features you need to deliver a seamless, easy-to-manage + real-time technology stack.

- ✓ Self-hostable (cloud + on-prem)
- ✓ Universally-interoperable + secure
- ✓ Low-code if you want, UI if you don't
- ✓ Knowledge base + 24/7 support
- ✓ Add AI to existing technologies
- ✓ Automate workflows for anything

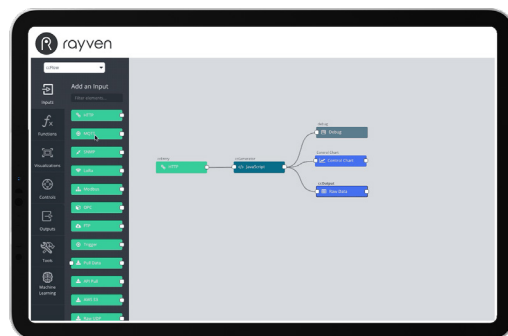

Create bidirectional connections with all your technologies, SaaS, data streams, in-field assets - **anything** - in minutes.

## Data Integration + Ingestion.

# Connect all your systems + data sources in real-time.

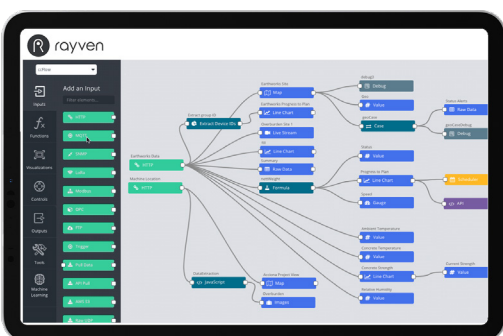

- ✓ Conquer Data Silos, Interoperability + Latency
- ✓ Infinite Scalability, Flexibility + Enterprise Security
- ✓ Create A Universally-Available Real-Time Source of Truth

## Data Orchestration, Logic + AI.

# Streamline data orchestration, automate processes + add AI.

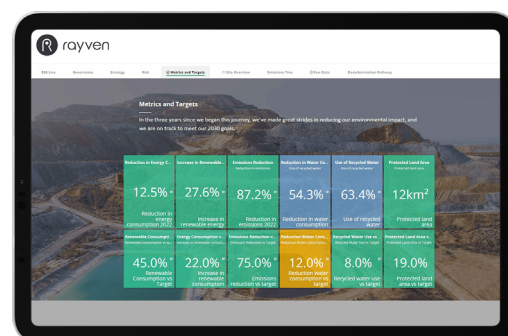

- ✓ Conquer Real-Time Data ETL, Management + Analysis
- ✓ Build Workflows, Automate Processes + Speed-Up Decisions
- ✓ Train, Test + Deploy Machine Learning + GenAI Models

## Frontend Interfaces + Functions.

# Build UIs, alerts + reports that deliver an exceptional UX, everywhere.

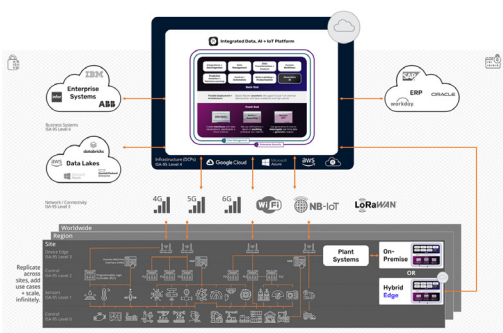

- ✓ Conquer Data Silos, Interoperability + Latency
- ✓ Infinite Scalability, Flexibility + Enterprise Security
- ✓ Create A Universally-Available Real-Time Source of Truth

## Platform Foundations.

# Ultra-secure, infinitely scalable + does everything you need.

- ✓ Accelerate development with integrated tools + workflows
- ✓ Ensure security + scalability for robust all-round performance
- ✓ Gain full control with customisation and real-time insight

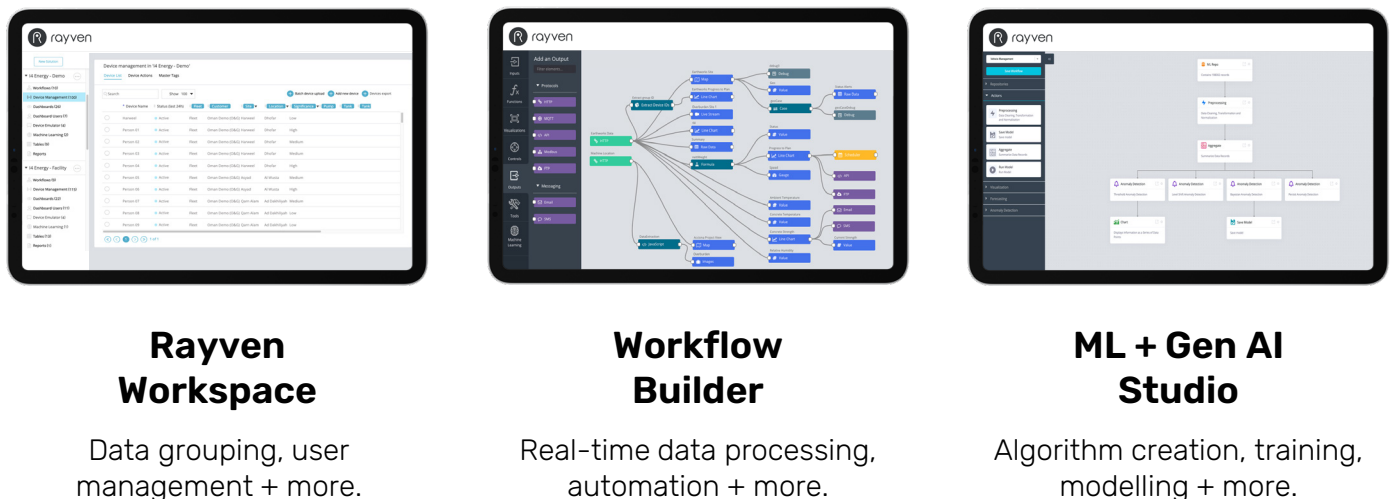

# Build **highly-customised apps** with real-time, predictive + conversational analytics, fast.

Using a **complete no- and low-code toolkit.**

# Rayven is **affordable** for every business.

Engage with us or our technology in multiple ways, depending on your needs, resources + timelines.

## Included in all plans:

- Premium Workflow Builder
- Device + Data Management Interface
- All Input Nodes (for Data Ingestion)
- Custom Scripts (for Integration)
- All Function Nodes
- All Visualization Nodes
- All Tool Nodes
- Device Emulator
- Email Notifications and Alerts
- All Dashboard Widgets
- All Security Features, Including Rayven Defender
- User Management
- Flexible Deployment Options
- Ongoing Maintenance and System Updates

# End-to-end services.

We do much more than just provide the technology.

Our team of experts provide a range of services that utilise their experience delivering custom real-time apps around the world, giving you as much support as you need now and into the future.

We can **shape engagements to meet your needs**, including:

- Solution Design
- Data Integrity
- Quality Assurance
- Deployment
- Data science + AI
- Technical Support
- Scale + Develop
- Project Management
- Training

## Discover **Fast Start**.

We offer a **3-step programme** that takes you from scoping to delivery + beyond.

Each section is **standalone** and can be completed as your needs evolve, working to timelines and budgets.

### Phase 1: Scoping

Use case prioritisation  
+ solution design.

### Phase 2: Implementation

Data consolidation, processing  
+ visualization.

### Phase 3: Scale

Add automation +  
AI capabilities.

## Need (some) help? **Service Packs.**

Buy a bundled number of Rayven service hours at a discount and get help when you need it. Our Service Packs last for 12 months and are configurable to your specific needs. **Speak to us to find out more.**

We've created **100s** of custom apps  
with businesses + partners around  
the world.

From our head office in Sydney, Australia, via our country offices and partners around the world, we have delivered custom integration, real-time data + AI applications for industrial businesses globally.

# Partner with Rayven.

Rayven empowers businesses to solve their customers' biggest challenges by working with them to create and deploy custom applications.

Our technology comes complete with all the features that you need to build the applications that your customers need, helping them to seize efficiency, productivity, ESG, and other opportunities.

Rayven presents the fastest, most affordable way for you to **develop new products, add capabilities, and open novel revenue streams.**

[Download Rayven Partner Brochure](#)

## Offer the custom applications your customers need, **simply.**

Fully **white-label** + brand your applications

**Own the IP** of what you build or develop

**Get help** at every stage: create, sell, deploy, scale + more

Generate **new recurring revenue** that's low-churn

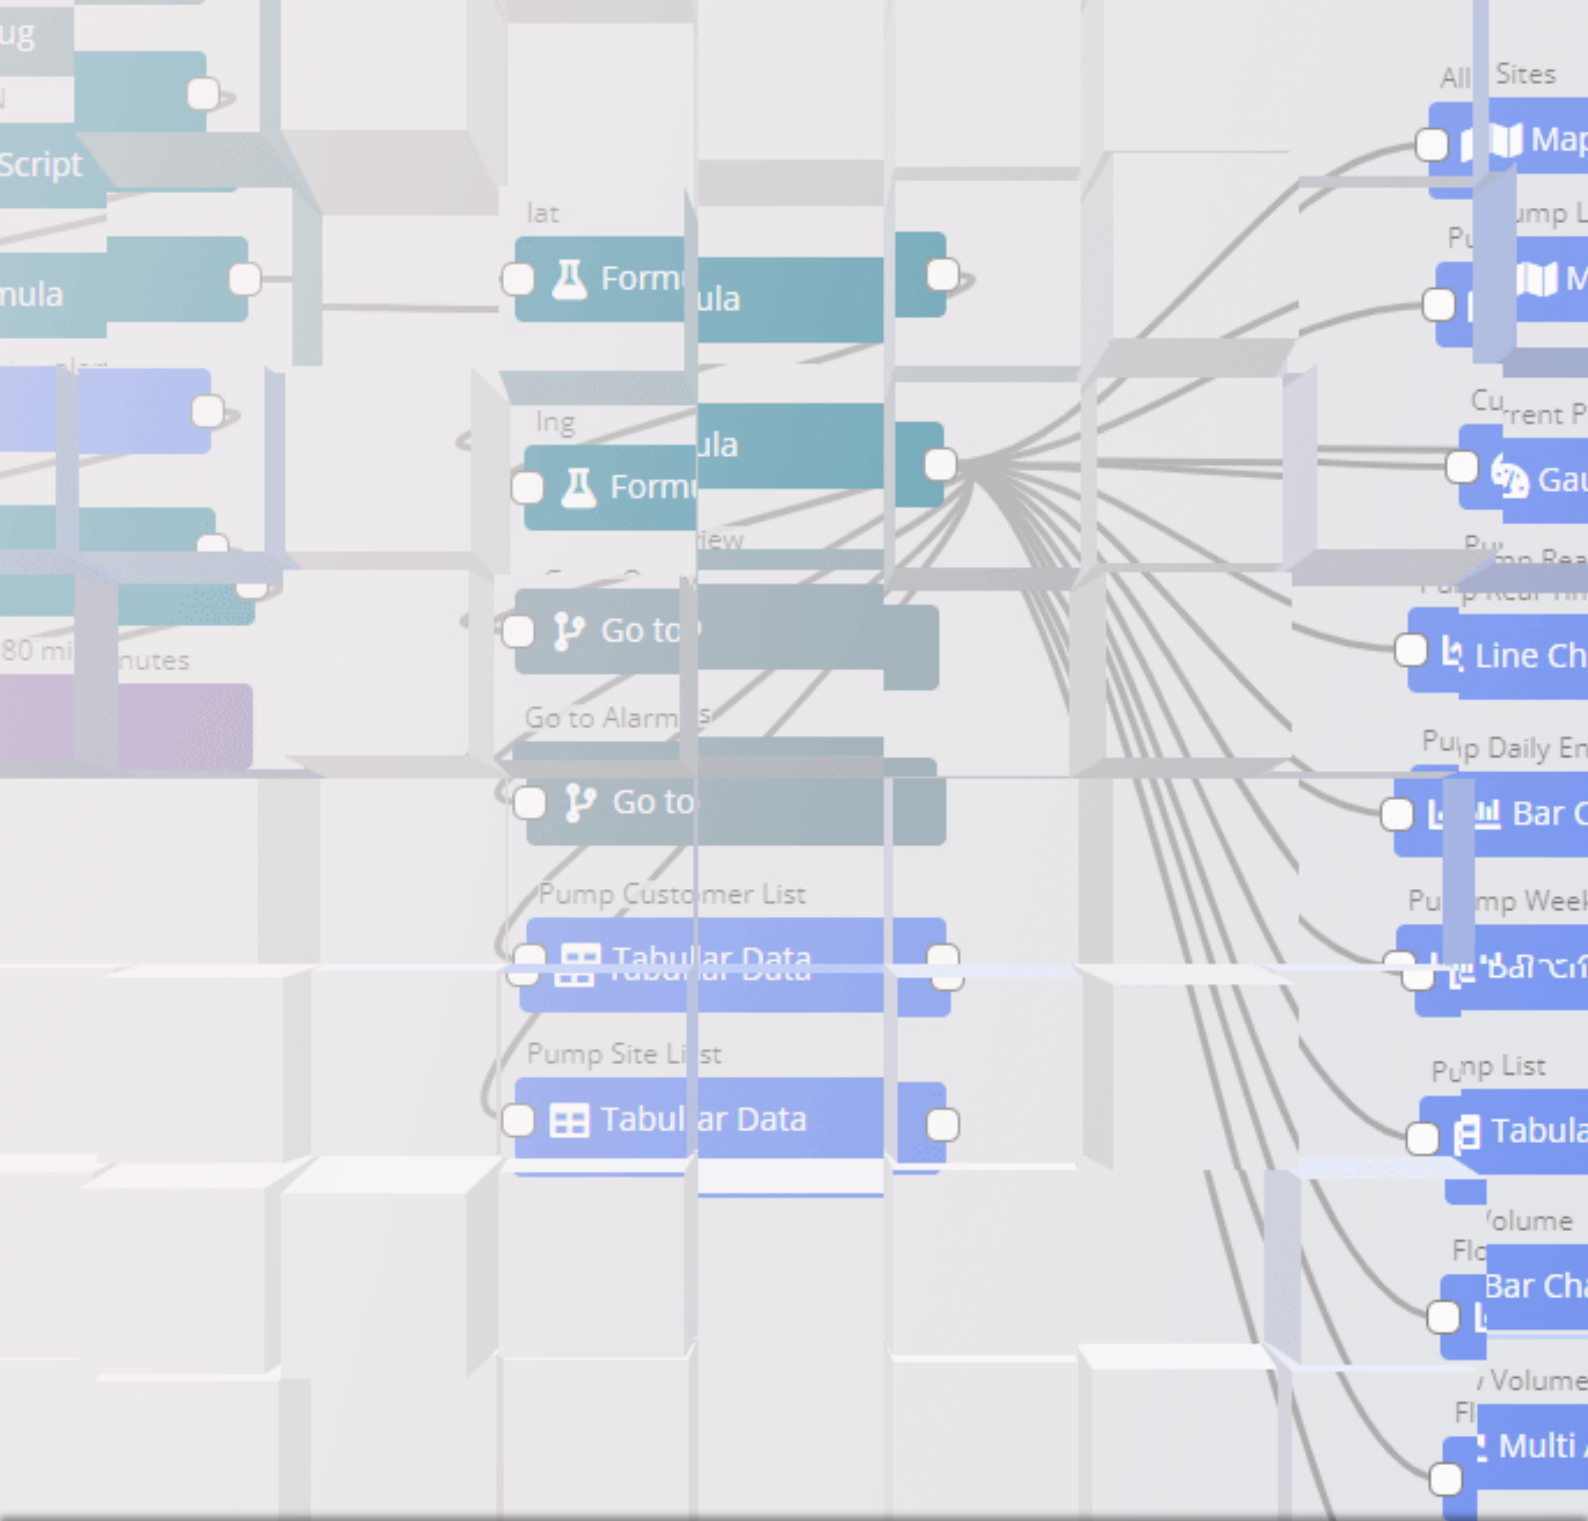

If you're interested in exploring real-time technology or doing more for your customers using your existing skills or hardware.

### We work with many different business, including:

- Technical services
- Mechanical services
- Engineering companies
- Telcos + comms providers
- Industrial automation
- Plant + machinery OEMs
- Maintenance services
- Device, sensor + gateway providers
- Industry consultants
- Computer hardware providers
- Environmental services
- Software companies
- Solution providers + integrators
- System aggregators

Example  
**Partner Applications.**

# Not got time to build? Discover **off-the-shelf** applications that deliver measurable improvements, fast.

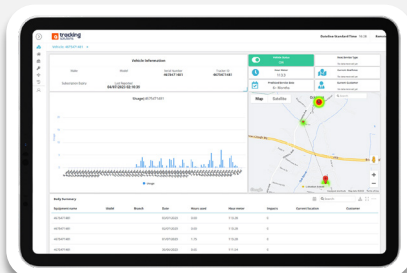

Our partners offer a range of off-the-shelf applications for particular use cases that are quick-to-customise and deploy, saving you time and money.

## Example partner applications include:

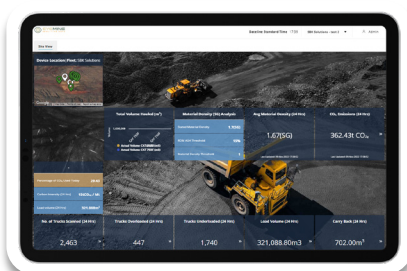

### Energy Efficiency

MyEnergy Plus is an advanced energy monitoring, compliance and optimisation solution for facilities. It delivers granular, accurate data in real-time so you can run sustainability compliant buildings, simply.

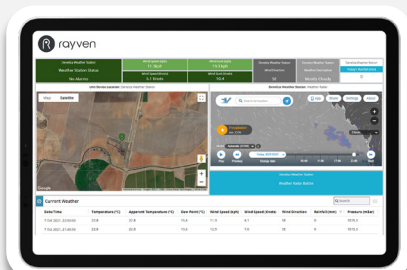

### Asset Tracking

Tracking Solutions is a forklift fleet management solution that delivers real-time utilisation, maintenance, and location tracking insights alongside advanced alert and reporting capabilities.

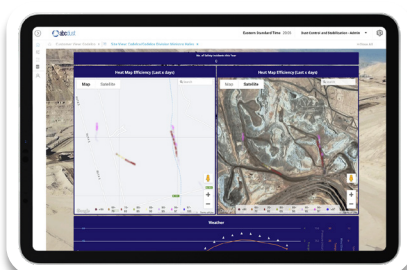

### Load + Haul Efficiency

EYEMine enables miners to review key measures in real-time, assess machine and operator performance, and execute insight-led decisions, delivering measurable sustainability and production benefits.

### Asset Monitoring

PLF provides agribusinesses with a complete view of their entire operations, enabling customers to make it easier to achieve their goals and better manage their operations, all whilst maximising returns and profitability.

### Dust Suppression

ABC Dust is a dust monitoring and control solution for mining. It tracks geo-located dust levels in real-time and optimises water use based on scheduling, offering web-based tracking, analytics, and reporting.
